

DUDLEY

TOILET SEATS

1

Product Description

The new range of Dudley quality toilet seats provides a reliable solution to most applications.

Like all Dudley bathroom products, our seats undergo rigorous and exhaustive testing. They are robustly manufactured from proven thermoplastic and thermoset materials and come with a two year guarantee.

Uses

Wherever plastic toilet seats are required, the Dudley range can be installed with confidence.

Supplied with adjustable hinges as standard*, Dudley seats can be used with the majority of WC pans sold in the UK but are particularly suitable for use with back-to-wall and close coupled suites. Their attractive, glossy finish adds the perfect touch to any domestic bathroom or commercial/public washroom.

Special Features

Our easy-fit hinges (inset 2) are fitted in seconds. The nut slides over the thread and requires only a few turns to tighten. As a result, installation is quicker and simpler than with traditional hinges. The hinge centres are adjustable to suit most WC pans. Top fix hinges can be supplied for use in back-to-wall and other applications where access from below is restricted. For replacement hinges, see page 44.

Every seat comes with an aesthetically pleasing, scratch-resistant glossy surface. This hard-wearing finish is simple to clean and helps to keep bathrooms hygienically fresh. This is particularly beneficial in hospitals and other public areas where maintaining cleanliness is of paramount importance.

Durable rubber buffers (inset 4) cushion and protect the seat and cover, helping to maximise working life.

Where available, soft-close hydraulic hinges (inset 5) provide an extremely gentle and silent closing action and prevent the seat from crashing down onto the fingers of children and other users.

*Except for the soft-close hinges on the Celine seat.
